Designed by an engineer in New Zealand, BLUNT is a patented, revolutionary umbrella featuring an unflappable aerodynamic structure that provides maximum control, even in the most demanding weather conditions. Its Radial Tensioning System (RTS) creates a unique canopy with a flatter aerodynamic profile supported by double struts and floating ribs, and patented "blunt", rounded tips; all of which eliminate the major flaws of conventional umbrella design, and set BLUNT apart from everything in the market.

BLUNT a most unusual "personal weather protection canopy"...

This very special cap-off rollerball pen celebrates the birth of the world's greatest democracy, the United States of America. Made from ivory-colored resin and aged .925 sterling silver trims, this pen is limited to a few hundred pieces. A sophisticated scrimshaw technique is used to replicate the full text of the Declaration of Independence into the barrel of the pen. The writing is small, just large enough to be legible to the naked eye, but still small enough to leave room to inscribe images of the founding Fathers who drafted the act. The refill cap is intricately engraved with the American bald eagle. Unscrew this cap to reveal the decorative Liberty Bell. A specially engraved magnifying glass is included with each pen to pay closer attention to the intricate details. The pen and magnifying glass are packaged together with a scroll in a special collector's edition box made from American walnut wood. The top of the box and the inside of the lid are made from leather and engraved with the names of the signatories from the historic act.

Designed by Pininfarina, famous for designing Ferrari and Maserati automobiles, and limited to 930 units, this unique rollerball pen is made from unidirectional carbon graphite, light and virtually indestructible. It is the first time this material has been used in the manufacture of a pen. The pen features a rotating nib extraction mechanism, eliminating the need for a cap. It is packaged in a retractable carbon graphite case, echoing the pen's retractable mechanism. Limited to 930 pieces. Visconti technicians have managed to miniaturize the pen clip's working components and conceal them inside the clip itself, so that the clip has become a minor masterpiece of the mechanical art that functions impeccably.

## REDWEAR FABRICATIONS:

### MICROFIBER:

This ultra soft luxury fabric is tightly woven from extremely fine filaments; it is naturally water repellent and wind-resistant. Amazingly, it is also breathable and moisture-wicking so that you stay dry and comfortable. Microfiber is one of the lightest weight, most comfortable and durable fabrics available.

### MICRO FLEECE:

Microfleece, made from microfiber, is brushed to compact the fabric

and to build air pockets for insulation. Microfleece is wind-resistant, anti-pilling, quick-wicking, water repellent, lightweight, easy care, retains shape, and has a luxurious drape. Microfleece provides great warmth without having to be heavy weight.

### BONDED FLEECE:

Bonded fleece combines the best of natural and high-tech fabrics. It has all the benefits of a Microfleece outer with the comfort of soft t-shirt material on the inside. This union of fabrics also allows for stylish color contrasting details. Great warmth and comfort without heavy weight or bulkiness.

### BAMBOO FIBER AND BAMBOO CHARCOAL:

Bamboo fiber possesses important natural properties: it is anti-bacterial, anti-fungal, anti-static, and UV protective. The cross-section of the bamboo fiber is filled with micro gaps and holes to promote superior moisture absorption and ventilation. It absorbs and evaporates perspiration without sticking to skin. Because of its amazing natural properties, bamboo is a great alternative for sensitive skin. The fabric is incredibly soft, strong, durable and easy to care for; it can be washed, dried, and ironed like cotton. The bamboo plant is 100% naturally grown without the use of pesticides or fertilizers, and is 100% Biodegradable and causes no harm to the environment. Because bamboo is also the fastest growing plant in the world, it is considered sustainable and renewable.
